A. PORTFOLIO

Adam Aldred

Design Process

- Research and Brainstorming
- Design wireframe layouts
- Choose a color scheme and font styles
- Collect and resize images
- Use of flex box and tables
- Protype testing Html, Css and JavaScript
- Evaluate the design
- Produce final product

Functionality and features

- Responsive on all devices
- JavaScript - on click functions
- JavaScript - Welcome message
- JavaScript - date, time, weather
- Links - LinkedIn, GitHub and Google Maps
- Gallery
- Icon in the tab

Usability considerations

- alt attribute on image tags and lang attribute on the html tag for accessibility

- title attribute on anchor tags, buttons, images and links for a description

- The use of white space and padding to unclutter the website

- Font and background color contrast ratio

- Transparent background for font on an image

- A responsive website on all devices

- The use of correct and relevant content - focus more on content and layout functions
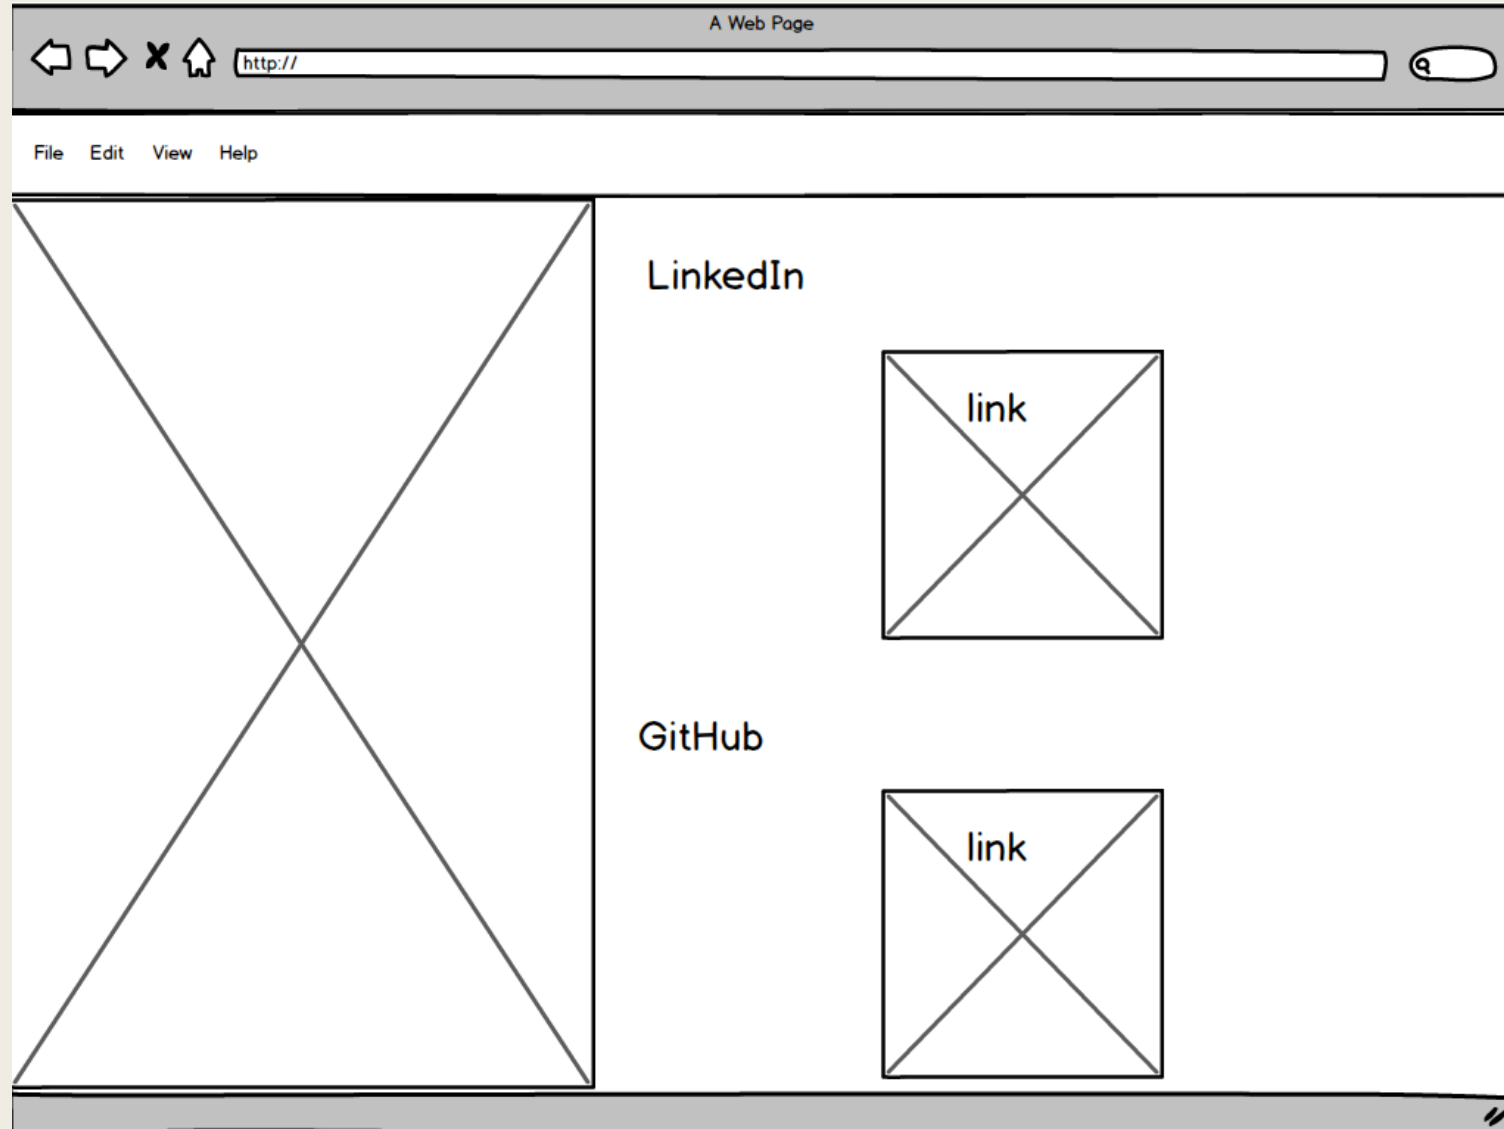

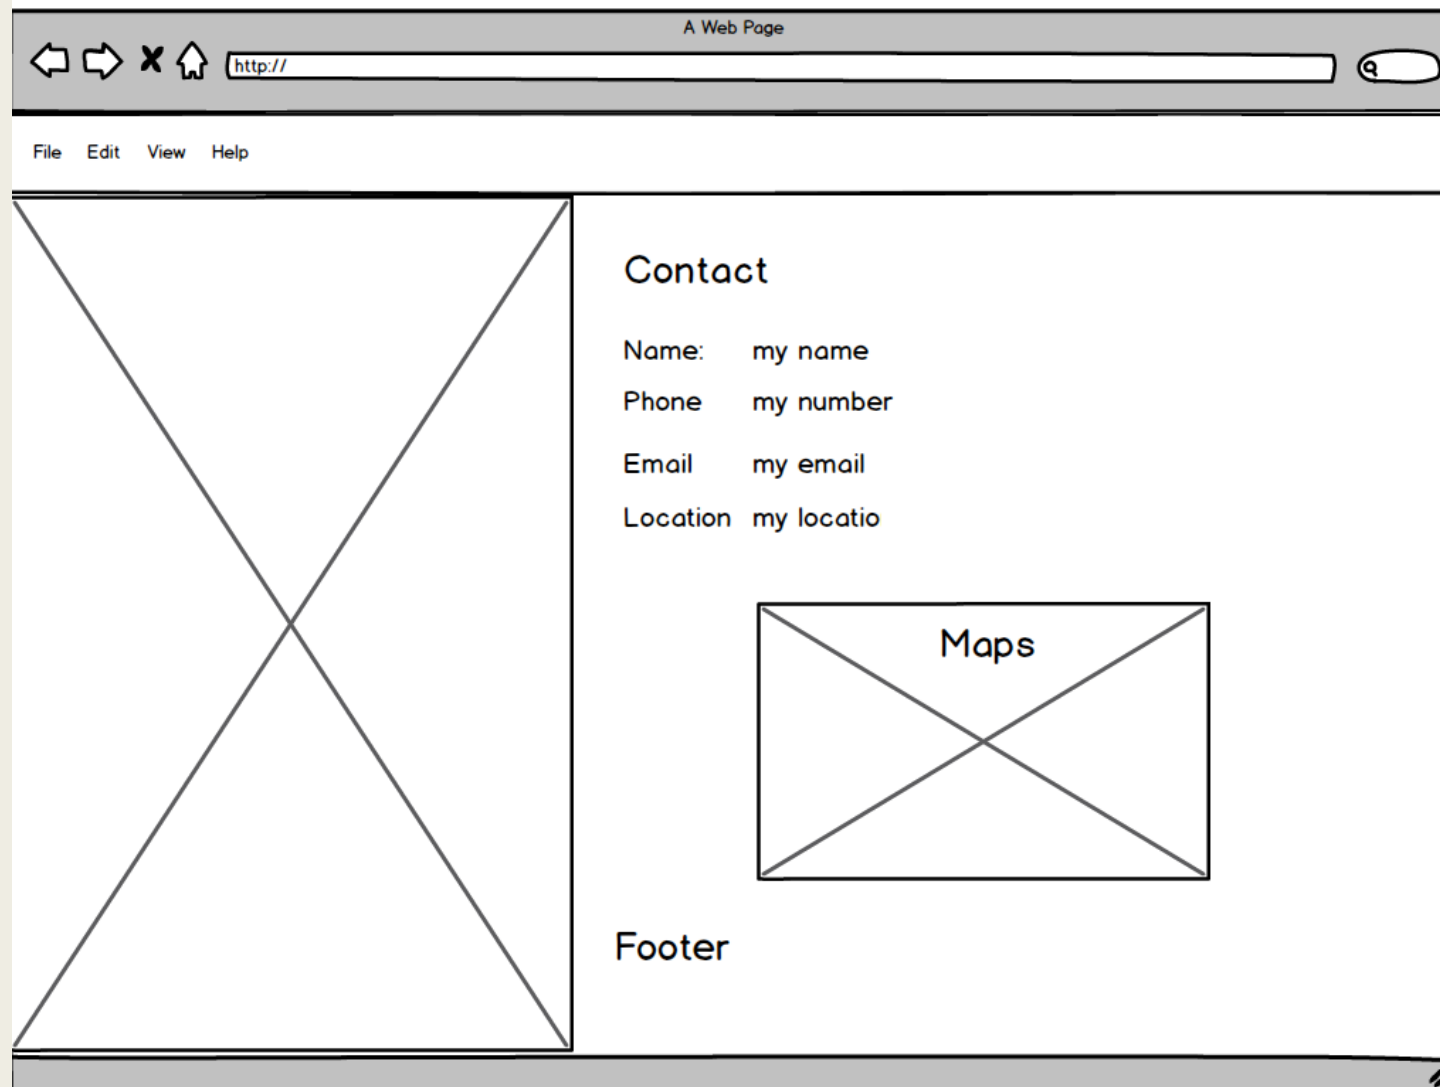

Wireframes – Welcome Message
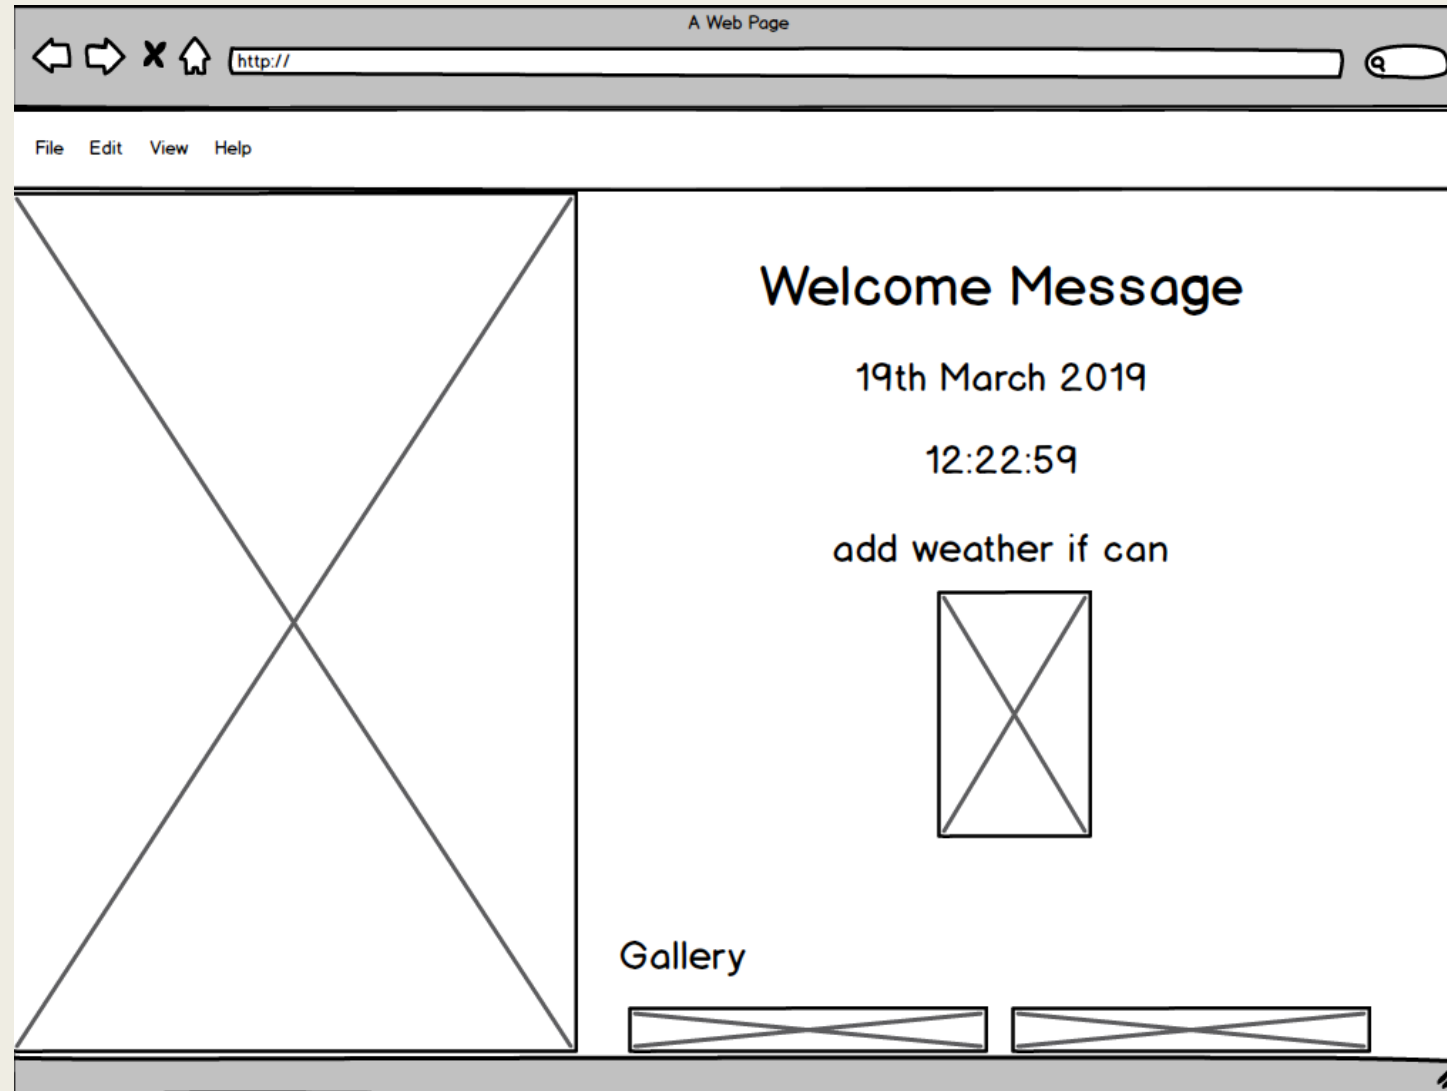

Wireframes – Gallery – Flex Box
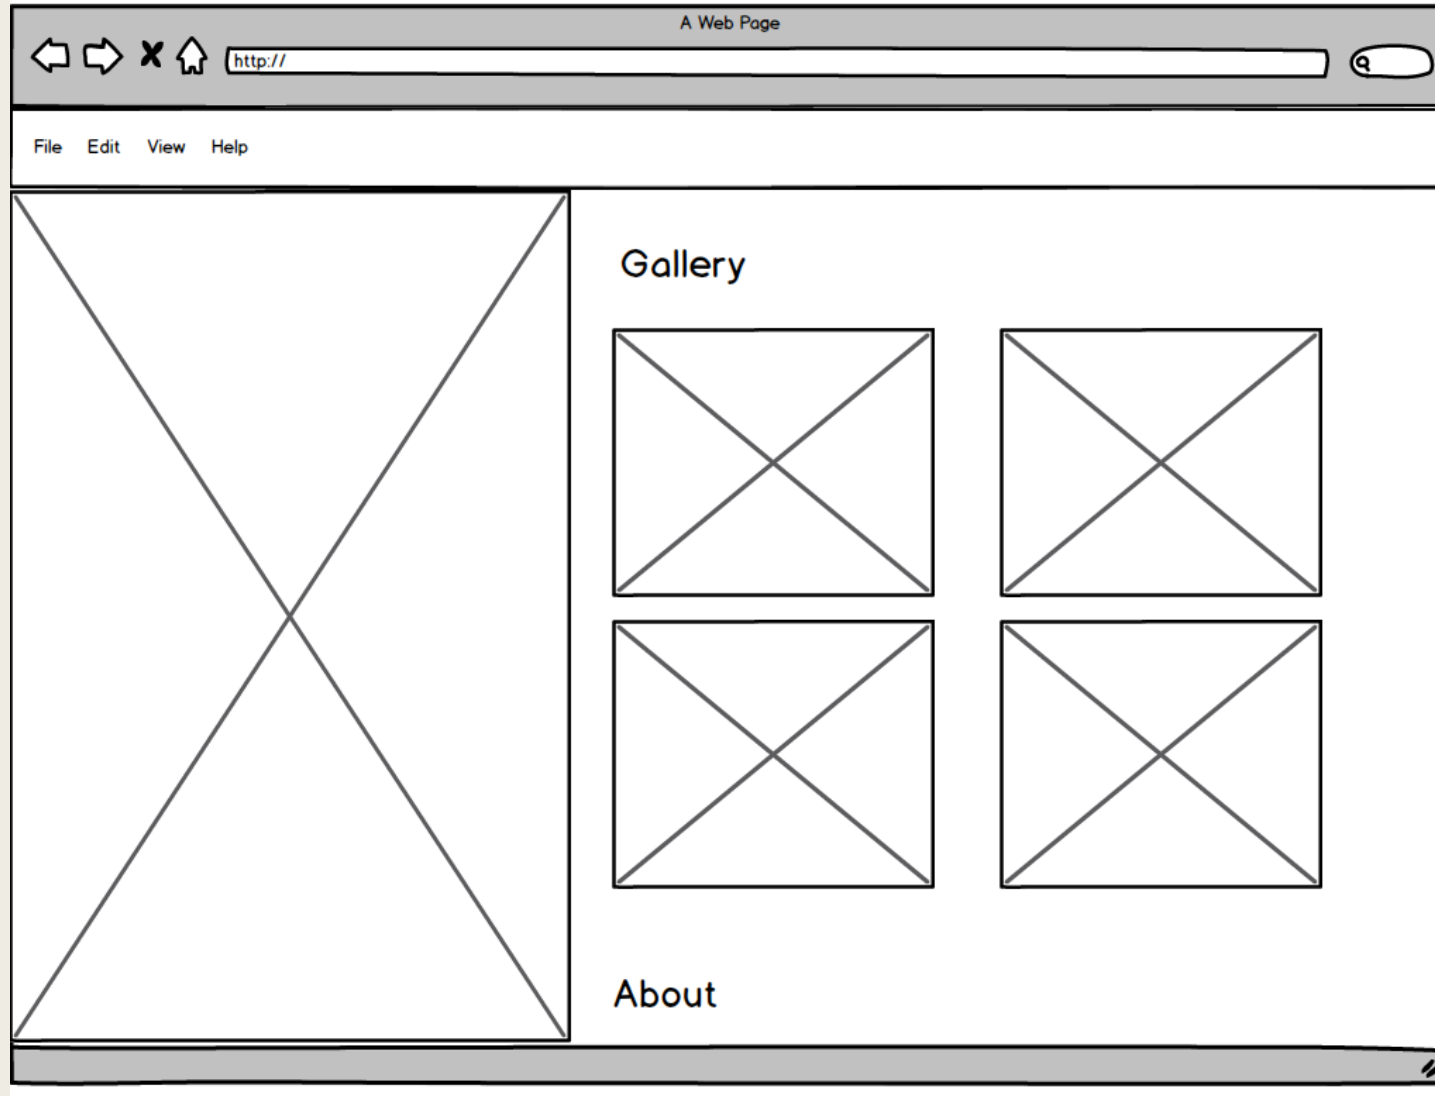

Wireframes – History – Flex Box

Wireframes – Image links

Wireframes – Contact – Table
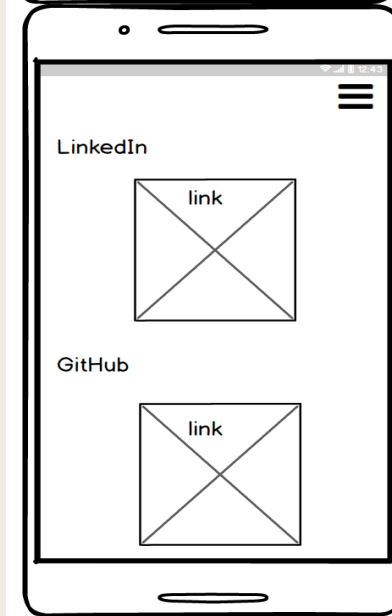

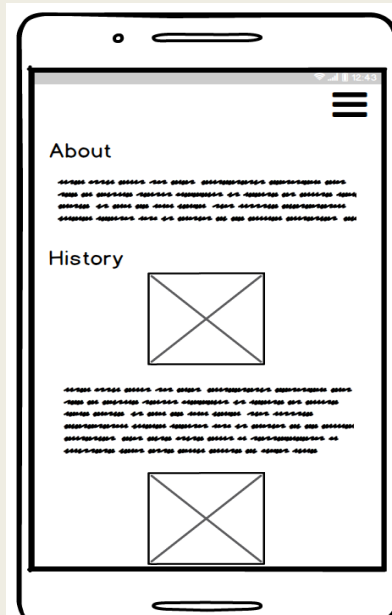

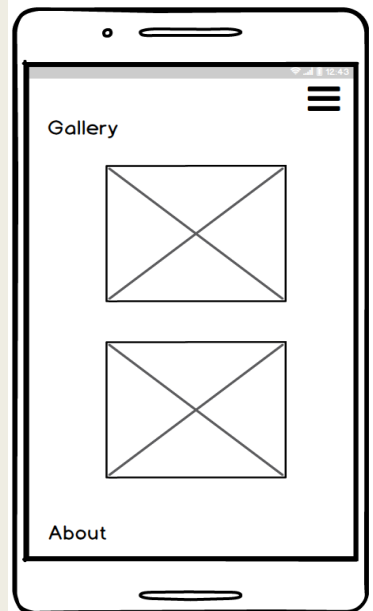

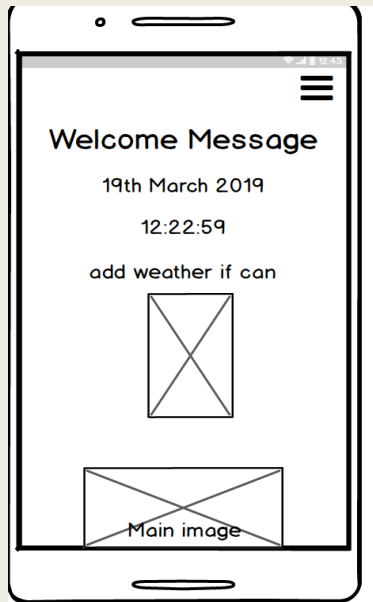

Wireframes – Phone size
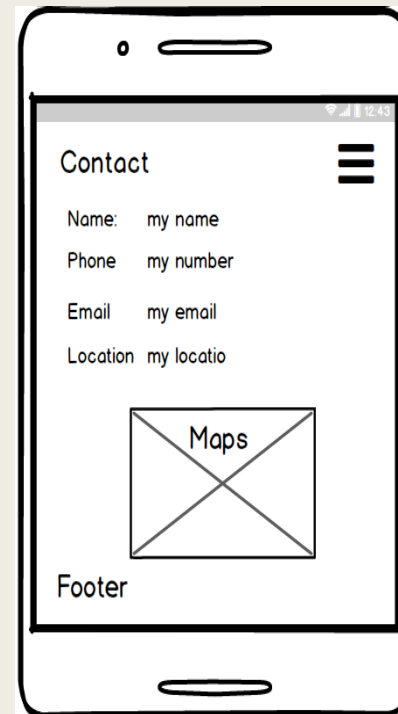

Tech and languages

- Html5
- Css3
- JavaScript
- Fireworks
- Photoshop
- GitHub

- Balsamic
- Visual Studios
- terminal
- Cloud Flare – (CDN)

Project Planning and Timeline

Day 1-2

- – *1. Research and Brainstorming*
- – *2. Design wireframe layouts*
- – *3. Choose a color scheme and font styles*
